NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs.

Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT be adjusted for cooperative education, etc.

All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

\*Fall 2000 college total includes 51 SSH for the doctoral degree; fall 1999, 45 SSH.

School	<u>11,731</u>	<u>12,741</u>	<u>13,731</u>	<u>15,051</u>	<u>15,346</u>	<u>16,360</u>	<u>16,032</u>	-2.0	4.5	36.7

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs.

Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT be adjusted for cooperative education, etc.

All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.
