NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs.

Figures in the **BEGIN** column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. They are NOT adjusted for readjusted cooperative education, etc.

All columns labeled **FINAL** are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

* Spring 2001 SSH college total includes Center of Pedagogy graduate and doctoral.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs.

Figures in the **BEGIN** column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. They are NOT adjusted for readjusted cooperative education, etc.

All columns labeled **FINAL** are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.
