NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs. Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT been adjusted for cooperative education, etc. All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

\*Fall 2002 college total includes Center of Pedagogy SSHs and 48 SSH for the doctoral degree. In fall 2001 doctoral SSHs were 45; in fall 2000, 51.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs.

Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT been adjusted for cooperative education, etc.

All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

\*Fall 2002 college total includes 6 SSHs for the doctoral degree.

\* College total includes SSH for majors of Justice Studies and Women's Studies. Fall 2002 this includes 828 for the Justice Studies major and 360 for Women's Studies.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs. Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT been adjusted for cooperative education, etc. All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

\*Fall 2002 college total includes 36 SSHs for the doctoral degree.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs. Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT be adjusted for cooperative education, etc. All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses.

\*Fall 2002 college total includes 3 SSHs for the doctoral degree.

The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs. Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT be adjusted for cooperative education, etc. All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses. The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.

NOTES: Student semester hours, SSHs, are calculated by multiplying the number of enrolled students in a class by the number of class credits. Thus, 30 students enrolled in a 3-credit course generate 90 SSHs. Figures in the BEGIN column of the current semester are the number of SSHs at the beginning of the semester and include everyone registered as of the 10th day of classes. These SSH have NOT be adjusted for cooperative education, etc. All columns labeled FINAL are actuals, calculated at the end of the semester with all students receiving WD grades removed from the data base. As well, these figures reflect the redistribution of SSHs for student teaching, cooperative education, and cross-listed courses. The % semester change reflects the difference between the beginning of the semester SSH and the final, end of semester actuals.
